Hello sir, he can tell, the authorities are making policies , what legal instruments to manage market today helmet?

As early as 2001, has provisions on quality standards helmets for motorcycle drivers, motorcycle. Which clearly states: "The enterprise produced or imported helmets to ensure good quality caps, in accordance with the standards of Vietnam before being circulated in the domestic market " .

In 2008, the Government implemented the Law on Product Quality goods, the Ministry of Science and Technology has issued a regulation helmet countries (NTR 02), specifying the quality standards and requirements quality of helmets, thereby giving management measures caps before circulation in the market.

As a rule, each hat to match the quality specifications in accordance with prescribed standards, certification audits are conformity, conformity announcement, marks of conformity and test state of matter before quantity imported into Vietnam.

But over time, according to the survey, the majority of people in traffic when frequent use helmet use does not guarantee quality, these are the kinds of fashion hats, caps for pedestrians, helmet type helmet-like but not a helmet. These types of hats are not safe for people to use when having problems, accidents, even, they can also cause more injuries to the employer.

In this situation, following the instruction of the Prime Minister, the Ministries including the Ministry of Science and Technology, Ministry of Industry and Trade, the Ministry of Public Security, the Ministry of Transport in cooperation, issued Joint Circular 06 / 2013 includes many strict rules about helmet. It requires strict quality check through the stages caps: imported; produce; business. The examination of the chain, eliminating the phenomenon of businesses, establishments selling all kinds of helmets, but actually not a helmet, mislead the consumer .

The easiest way to distinguish true and false MBH is based on the standard stamp CR and trademarks. Illustration

The state agencies, especially the Ministry of Science and Technology play a role in how the implementation of quality management helmets?

Currently, the IRR for the quality, how to manage and check the helmet was relatively full. However, people still use the helmet does not meet the standard, it is not the responsibility of the Ministry of Science and Technology.

"Parliament in countries around the world, all the new holiday, every time there is a holiday alone, are affected ..."

NICE PHOTO

the market appears those caps not helmets (helmet fashion), you need to have the Ministry of Public Security, Ministry of Industry and Trade, Ministry of Transport in collaboration eliminate substandard helmets this.

Legal documents were full, but the phenomenon of selling helmets "phony" is still rampant on many streets, so he is your assessment of the implementation of the law of the people?

Provisions were full, but law enforcement has not been well observed from the enforcement to the production facilities, business helmet.

Joint Circular 06 specifies the role of the four ministries in implementing quality checks helmet, which emphasizes the role of inspection and examination process of importing, manufacturing, trading caps . The hat shop not fool people, sells helmets understand not guarantee quality but still stamping, fake labels. Ministry of Public Security should direct the police force communes severely dealt deliberately manufacturing facility, business substandard helmets.

Besides, should appreciate the role of local authorities, because they can understand the situation of their local business, they know what shops, places selling substandard helmets. However, the deployment enforcement helmets eliminate "fake" by the local authorities have not really seriously, so there are many streets, shops selling fashion spread this kind of hat.

On the drastic need of local governments to rid rampant phenomenon sale substandard helmets.

Illustration

He can tell the difficulties and problems of the authorities in implementing management policies helmet in recent years?

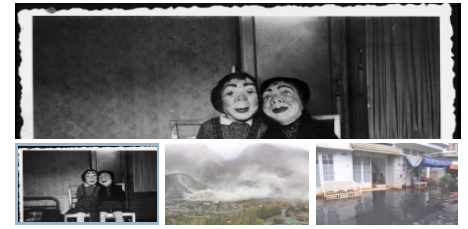

The first difficulty is the unification of the management bodies of four ministries to get the Joint Circular No. 06 in 2013, the government took two years for the preparatory work can achieve unity.

Enforcement of the regulations implemented in the legal text exist problems, the entry of the parties involved in the inspection, testing is not really serious.

Another complication is that the producers want to profit big hat, so, they defied the law to produce shoddy hat, inappropriate regulation, deceive buyers.

So what solutions need to implement policies for the management of state helmet?

On measures, the Ministry of Science and Technology has proposed to the Prime Minister gave the helmet to the list of commodities trading conditions for easy management, from production to

trading and distribution. This management process will help eliminate substandard hat soon.

However, this is only necessary but not sufficient measures in time to the relevant authorities, local governments have to be involved more drastic in the inspection, testing and production base helmet "phony". The inspection, testing not only follow the movement but as it is responsible.

Besides, the helmet manufacturer righteous should jointly established "Association helmets produced" a strong voice to help eliminate the production facilities do not ensure quality hats.

Thank you!
